

January 2023 Moving in Faith

Calvary greetings, receive greetings from the Kenya mission youngsters for Christ team together with Sammy's family. It is with the hope that this email helps you see the great commission that Jesus gave to them that love and obey His command.

As we have begun the new year 2023 we would like to bring a few captions of the past year 2022. As we reflect back on the previous year of the ministry the Lord Jesus was so merciful and good to us. To open doors for youngsters for Christ team for ministry through different programs (outreach to schools and communities, reaching young girls on the streets and communities and supporting them with a hygiene monthly pad, reaching out to children through indoor and outdoor programs, supporting the local village churches through training in leadership and discipleship in mission, and our children feeding program). In spite of challenges somehow God made a way. Souls came to Jesus, dead hopes were reborn, community differences were resolved and we rejoice because of what the Lord did in 2022.

As we have begun the year 2023 our theme for this year is 'Moving by Faith,' even as we obey the great commission. "Go ye, to the nations and make disciples..." This is a year that we are believing God to be able to move into places and bring the hope of Jesus through his word. That will bring a transformation to the glory of our Lord Jesus.

We wish to ask you to come along with us in this journey of 2023 in making it possible to bring a transformation in someone's life through your partnership.

- **Outreach to schools and communities:** We strongly believe the grace of God has made all things possible to bring a great commission to all people. This new year we want to focus on developing at least seven key leaders in each and every school and community that will play a role in spiritual multiplication and in support of discipleship.
- **Girls outreach:** With a desire to bring transformation and hygiene to the girls we are working towards forming a career-developing program in support of the girls even as we share Jesus with them. Hygiene being a need to them we hope to continue supporting them with a hygiene pack every month.
- **Training/Supporting local churches in the village:** With so many having the desire to preach the Gospel to the villages we as a mission desire to be a tool of hope and transformation to these churches through the training and teachings. Also, we wish to be able to get them relevant materials in support of their wish and desire to preach the Gospel to their communities.
- **Children feeding program:** Someone said in a conference I attended in Uganda, "If you buy a needy child a toy it will mean nothing, but when you give a needy child something to put in their stomach you would have done more than words could tell." We hope through our feeding program to reach out to these needy children in Kibera slum through our VBS coloring classes or painting, memory verses clubs with the hope of sharing with them the good news. Many go without food.

In 2023, we hope that God will make it possible for us to bring our youth together and bring them out of Kibera for a four or five-day youth camp to a venue where we are trusting God to locate out of Nairobi city. In a new environment where they will be teaching, career development, and counseling among others.

It will be encouraging to us just to hear from you.
